About Me

My interest in programming at high school. I enjoyed being able solve my day to day problems this way. So I decided to pursue this as a profession. Currently I am a second year computer engineering student. I am interested in server-side development and embedded systems. However, I am always open to learn new things. I still carry the enthusiasm that I had on my first day. Looking forward to improving myself.

Experience

Backend Developer (Clipro Connect – 2021/22)

- Built a REST-API, with Python, Flask
- Built a database with MongoDB

Education

Atılım University (2019-2024)

Department of Computer Engineering - CGPA: 3.48

Skills

Programming Languages

- Python, 5-year
- Java, 1-year
- C/C++, 1-year

Database

- MongoDB, 1-year
- MySQL, (Familiar)

Frameworks

- Selenium
- Beautifulsoup

Operating Systems

- Linux, 5-year (Mainly Debian and Arch)
- Windows, 5-year

Languages

- Turkish (Native)
- English (Advanced)
- German (Beginner)

Extra-Curricular Activities

IEEE Society, Women in Engineering

- Coordinated the meetings
- Created presentations about, basics of programming, OOP and Python

Projects

Spotify-to-Tidal

Developed a python script that depots all playlists of user at Spotify then creates exact playlist at Tidal and looks for closest match of tracks, available on Github.

SandBox-Lingua

A Python project that solves questions in Lingua-Attack, available on Github.

Blur_lock

A shell script to make easier usage of i3blur-lock, available on Github.

Personal Interests

Music

FL Studio

Sport

Ping Pong
Poll

Video Games

Story based computer games
